

December 15, 2021

I have worked with Lisa and the team for over 5 years on multiple complex regulatory submissions to both the FDA and CE.

They are attentive, professional and have been an integral part of our medical device development from planning clinical testing through to performing full and thorough clinical analysis and providing detailed statistical reports.

I highly recommend BioStats to any company that needs high-class statistical support, from a friendly, available team.

Sincerely,

*Dr. Ronen Gordon, Clinical Director,
Nanox AI (formerly Zebra Medical Vision)*
