To Whom It May Concern

Re: **BioStats Statistical Consulting Ltd.**

It gives me great pleasure to write this letter of recommendation to Biostats Statistical Consulting Ltd.

During 2016-7 we conducted a clinical study in the FemTech arena, where Lisa and her team were our statisticians. We were very satisfied with the handling of the data gained in the study, and results were submitted to us on time. Team was very helpful in getting into specific analyses which were not part of the initial request, always willing to help, with good spirit.

We recently had interactions with FDA on specific points of this study, and Lisa was there for us, responding immediately to all FDA's requests for specific analyses. This was a great help for us in such moments of stress, when responses were needed with less than 24 hours.

I can all heartedly recommend Biostats Statistical Consulting Ltd to any company who needs bio-statistical consulting.

Sincerely,

Dr Elan Ziv, MD OBGYN FPMRS

CEO & Medical Director

ConTIPI Medical Ltd
